TEOC 110

Ethernet Over Coax Adaptor

The Smart Choice for Home Entertainment Networks

Enjoy fast, stable, reliable and safe broadband around the home using existing TV coax cable and TV points.

TEOC 110 uses MoCA® technology

Multimedia over Coax Alliance - to connect on-line devices and provide high speed broadband around the home using existing TV coax cable and TV points. The MoCA® technology enables performance levels which Wi-Fi and Powerline are often unable to meet with the growing demands on home entertainment networks.

The Smart Choice for Home Entertainment Networks

Smart TV's, Set Top Boxes, Blu-Ray Players and On-Line Gaming Consoles all require a fast and reliable broadband connection to maximise their potential.

TEOC 110

Triax Ethernet Over Coax Adaptor

- No new cables required**
 Create a high speed data network using existing TV coax cables.
- Stay connected with wired connectivity**
 For a fast, stable and reliable entertainment experience. Many new devices do not have Wi-Fi built-in and the router is often in a different location. TEOC 110 enables the online functions quickly and easily without installing new cabling.
- Immune from interference**
 Shielded TV coax cables are not affected by devices around the home.
- Reduce buffering**
 Faster downloads and content sharing (including HD video) to other devices on the home network (up to 175 Mbps).
- Quality of Service**
 Up to 16 TV points can be connected to give fast, reliable broadband connectivity in each location.
- Supports long cable runs**
 Access beyond the reach of Wi-Fi.
- Connect a Wi-Fi Access Point**
 Increase coverage around the home and eliminate dead spots where wired connectivity is not possible.
- Online Gaming**
 Fast and stable connection with lower latency creates a more immersive experience for gamers with smoother game play and faster response times.
- Network Printers**
 Reliable printing from around the home on a shared network printer.
- Simple to install with Plug and Play technology**
 A minimum of two TEOC 110's are required to create a basic network, then just plug in an additional unit wherever a broadband connection is required.
- Creates additional revenue streams for installers**
 Quickly and easily improve the home entertainment experience for clients with high speed data and video streaming throughout the house.

Art No. 310400

Wi-Fi can continue to be received in all rooms where the TEOC110 is installed.

Supplied with mains power adaptor.

Compatible with TV coax cable carrying Terrestrial signals only (DTT or CATV).

Cannot be used on Satellite TV systems or any connection where Satellite and Terrestrial TV are combined on the same cable. Broadband speed and performance around the home is dependent on incoming speeds from the broadband provider at a particular location.

MoCA® 1.1 Compliant
